Roger Shaw  
Gas Market Specialist  
Market Change  
Australian Energy Market Operator

Dear Mr. Shaw

**Re: Beach Energy's Gas Day Harmonisation Transition Plan**

The purpose of this letter is to describe the planned activities by which Lattice Energy Limited (**Lattice**) will ensure a successful transition from current gas day operating times to standard market timetable.

Lattice hereby wishes to advise AEMO that in line with National Gas Rules schedule 5, part 6, rule 4, the following have been identified that require changes to conform to the amendments made to the rules.

1. *Pre-harmonisation contracts*: All contracts impacted by the standard market timetable change are being reviewed to include amendments, where appropriate, relating to the definition of time and gas day. Affected parties will be advised prior to the transition day.
2. *Distributed Control System (DCS) & Gas Nomination System*: Modifications to the DCS at the Otway gas plant & nomination system to reflect the new time zone will be undertaken & implemented prior to the transition day. A testing program will be developed with engineers to ensure a smooth & successful transition.

Yours Sincerely

Vikas Mannaru

Product Sales Analyst (VIC)
